History of Vehicle Licensing

Vehicle Registration was introduced into the United Kingdom in 1903. Both Worcestershire County and Worcester Borough administered licences.

Each registration authority was allocated an index mark of one or two letters. The car registration number was made up of the index letter(s) followed by a number from 1–999. In practice, authorities issued up to 9999.

In 1932, Local Authorities began to use three-letter and three-figure marks. When these registration numbers ran out, Local Authorities were told to reverse the order of the letters and numbers. In 1963 and 1964 a suffix letter was added. This letter was changed on 1st January of each year. It was later changed to the 12 months commencing 1st August.
