Introduction

The Valuation Office Survey of 1910 resulted in the creation of a snapshot of land across the county of Worcestershire, in common with other counties in England. The associated Valuation Summary books are to be found at the Hive in Worcester: these books are of a large format, measuring 43cm by 34cm, cloth-bound with leather corners and the name of the Income Tax Parish (ITP) written on the spine. An ITP may cover just a single civil parish in the county, whilst some ITPs covered two or more parishes: for example, the ITP of Church Lench only contains records for the civil parish of Church Lench, whilst that of Abbots Lench covers the civil parishes of Fladbury, Hill & Moor, Throckmorton and Wyre Piddle, as well as Abbots Lench itself. In some cases, two or more ITPs can be found in the same Valuation Summary book: for example, Conderton and Overbury. The basic unit of valuation was a piece of land in separate occupation, although the application of this principle was not always straightforward.[1] The number of valuation assessments in each ITP ranges across the county from 7 (Kenswick) to 7,171 (Kidderminster Borough).

This series of booklets provides a transcription of the Valuation Summary books for each civil parish in the county of Worcestershire, along with a brief analysis of the transcribed data.

1. The Valuation Office Survey of 1910

The valuation of land in 1910 was initiated by the Finance (1909-1910) Act (10 Edw. VII, c.8 section 26(1)) which provided for the levy and collection of a duty on the increment value of all land in the United Kingdom. The main object of the Act was to tax that part of the capital appreciation of real property which was attributable to the site itself, excluding any benefit arising from crops, buildings or improvements paid for by the owners. In this way, private owners were required to pay part of the increase in the site value of their land which had resulted from the expenditure of public money on communal developments such as roads or public services.

Increment value duty was based on the difference between the amount of two valuations. The first was the site value as at 30 April 1909, as determined by the Valuation Survey, which constituted the 'datum line' for these purposes: a second site valuation was to be taken on the occasion of any subsequent sale or grant of a lease, transfer of interest in a piece of land, or the subsequent death of a land owner, in order to determine any potential payment of increment value duty. This second assessment formed part of the on-going role of the Valuation Office, until this duty was repealed by the 1920 Finance Act (10 and 11 Geo. V, c.18). Although this legislation was only in place for around ten years, it has left behind a comprehensive record of land in every county enabling an understanding of the ownership, occupation, extent and value of land. The data collected during the survey for the county of Worcestershire, which has been retained, is contained in four different sets:

- The Valuation Summary books (sometimes referred to as the Lloyd George Domesday books): these are held at the Hive in Worcester (WAAS: BA8585/1 series);
- Forms 37 – Land: these contain the provisional valuations, and are also held at the Hive in Worcester (WAAS: 8585/2-64 series);
- Two series of annotated Ordnance Survey maps: the Field Maps (used in the field during survey), some of which are now held at the Hive in Worcester; the Record Maps (originally

[1] See Brian Short, *Land and Society in Edwardian Britain* (Cambridge: Cambridge University Press, 1997), pp 131-132.

kept in the Valuation Record office) now held at the National Archives at Kew (TNA: IR129 series);

- The Field Books which contain a complete record of each valuation: again, these are held at the National Archives at Kew (TNA: IR58 series).

With regard to the Valuation Summary books, the first nine columns were compiled from the Rate Book for the parish and all of the books contain this information. Subsequent columns (10-40) were supposed to be completed by the staff of the District Valuation Offices after the initial valuation was complete: however, this was not carried out in a consistent fashion, and indeed, anyone interested in the mechanics and outcome of an individual valuation would be better served by the details contained in the Field Books.

This series of booklets provides a transcription of the first nine columns in that these record the ownership, occupation, extent, and basic valuation of each assessment. After a brief introduction to the parish, an analysis of the data will be presented examining the names of the major landowners and the extent of their property in the parish, along with an analysis of the main farms in the parish. Indexes of owners, occupiers and places appear in subsequent appendices and a final appendix will direct the reader to the appropriate references for the associated Forms 37, Record Maps and Field Books for the parish covered by the booklet.

This booklet presents the data for the civil parish of Bengeworth: it has been taken from the summary book for the Income Tax Parish of Evesham (Bengeworth).[2]

2. The parish of Bengeworth in 1910

The parish is a suburb of Evesham, which is located 14 miles south-east of Worcester and 6 miles east of Pershore on a geology described as 'Blue Lias Formation and Charmouth Mudstone Formation', extending to 1,351 acres. The resulting soils are described as lime-rich loamy and clayey soils with impeded drainage.[3]

When the census was carried out in 1911, the population of Bengeworth was 2,872 (1,453 males and 1,419 females): of the 673 properties recorded in the census, 634 were inhabited, 12 were uninhabited, two were described as 'building unspecified' and 25 were classed as a 'building not used as dwelling'.[4] From an agricultural viewpoint in the same year, the total cultivated area of the parish was 1,011¾ acres, of which 752½ were arable, and 259¼ acres (26% of the total) were grassland. This included 332 acres of orchards and 147¼ acres of small fruit. Of the 134 agricultural holdings in the parish, 127 were tenanted properties covering 962¼ acres (95% of the total). The main arable crops were beans, peas, cabbage, wheat and onions, whilst the orchards were growing plums, apples, pears and cherries. There was more arable than pasture land, and only 44 cattle and 10 sheep were kept in the parish.[5]

3. Land and property in 1910 in the parish of Bengeworth

In preparing the data for analysis, a series of standardisations have been made: see Appendix 6 for full details.

Of the 1,038 assessments with owners recorded in the Valuation Summary, 114 were owned by H. C. M. Porter, whilst Francis Darwin held 94 assessments in the parish. These two individuals were also the major landowners in acreage terms: see Table 2.

Appendix 6. Data standardisations made for the parish of Bengeworth.

In preparing the data for analysis, the following standardisations have been made:

- Where entries appear in either owner names or occupier names, which use abbreviations or the full name, the listings in Appendices 2 and 3 show the full name for all variations: for example, for cases with the same surname only, where *Geo* and *George* appear, these are all recorded under *George*; however, those entries with only the initial *G.* are not assumed to be *George*.
